- Beginner level position or Fresher

TRAININGS

Firebase For Android

Udacity (Online)
Oct 2017 - Oct 2017

The training was about the firebase for android in a weekend. Here they taught me about features of using the firebase. It provides a great learning experience to learn Firebase realtime database, authentication, notification, storage and analytics

Android Basics Nanodegree

Udacity (Online)

Jan 2017 - May 2017

I had done Android Basics Nanodegree By Google From Udacity and i had successfully submitted all 10 projects and got certified from them.

Training In C++ Programming

APTECH (Jalandhar)

Jun 2016 - Feb 2017

Done learning in c++ programming

PROJECTS

Square one website

Jan 2018 - Apr 2018

An e-commerce website having the same layout as of my android app and using the same database as firebase. Implemented on node/express server with view engine as jade. Used bootstrap for styling and integrating instamojo payment Gateway for payments

Square One

Jan 2018 - Apr 2018

An e-commerce Android application following google material design guidelines with firebase intergrating at backend. It is designed for college cafeteria recharge system with payumoney integration. Cafeteria □□ data is coming from firebase dynamically
